ABSTRACT

Information about tax assistance to public universities and colleges for 1979-1980 is provided. The report details state tax-fund appropriations alphabetically by state for operating expenses of higher education. Among findings were that the 50 states appropriated more than $19 billion for annual operating expenses in fiscal year 1979-1980, that state appropriations for operating costs of higher education registered an overall increase over the last two years somewhat higher than the rate of general inflation, and that the prices of goods and services purchased by colleges and universities have more than doubled over the last 11 years. Included in the highlights of the 1980 figures are reports of two-year rates of gain ranging from eight percent to 43 percent (with a median of 21 percent). Among the states at the high end of the gain are California, Louisiana, Arkansas, Kentucky, Oklahoma, New Mexico, South Carolina, and Tennessee. The states showing the lowest percentage of gain include Connecticut, Pennsylvania, New Hampshire, Montana, Colorado, Idaho, Arizona, West Virginia, Alaska, and Hawaii. The general trend is seen to be one of a slowing down of the tempo of growth of state tax support, but with growth nonetheless continuing. (PHR)

PREFACE

The National Association of State Universities and Land-Grant Colleges is proud to publish the 21st annual report on Appropriations of State Tax Funds for Operating Expenses of Higher Education by Dr. M. M. Chambers.

Over the years, these reports -- the "Chambers Reports" as they are called -- have provided timely and up-to-date information about tax assistance to public universities and colleges across the country. The Chambers Report, in fact, furnishes the earliest compilation of state appropriations for operating expenses of higher education extant. For that reason, it has become an invaluable guide for university and college administrators and for media representatives with a special interest in higher education.

This year's report shows that 50 states appropriated more than $19 billion for annual operating expenses of all higher education. Yet Dr. Chambers chronicles many instances of cutbacks and hardships which have slowed the growth of support.

While state appropriations for operating costs of higher education have registered an overall increase over the preceding two years, the cost of operating a typical college or university rose 7.8 percent in academic 1979, according to the newest higher education index compiled by D. Kent Halstead of the National Institute for Education. The index was developed by Dr. Halstead to measure changes in prices which colleges and universities pay for goods and services.

While colleges and universities managed, generally, to keep cost increases below the general 9.4 inflation rate over the past year, price rises have nevertheless had a serious impact on budgets. The prices of goods and services purchased by colleges and universities have more than doubled over the past 11 years, according to the Halstead Index. Soaring energy costs have doubled the operational cost for utilities. At the same time, the cost of fringe benefits for college and university employees went up 13.8 percent, an increase attributed by university officals to federal regulations requiring health plans to cover pregancy and to a sharp rise in hospital fees. Pension costs were driven upward as a result of federal regulations which permit employees to retire at an earlier age. Social security taxes also rose but professional salaries did not rise as rapidly as other segements in university budgets.

The financial pressures continue but, once again, the Chambers Report details the support which the 50 states have provided for fiscal 1980 -- support which is essential for students who would not otherwise have an opportunity for higher education and for the improved quality of life which education can make possible.

October, 1979

INTRODUCTION

The fifty state legislatures appropriated more than $19 billion ($19,075,829) of state tax funds for annual operating expenses of all higher education for fiscal year 1980. This sum represents a gain over the preceding two years of 24 per cent. This rate of gain is somewhat above the rate of general inflation over the identical period, and therefore includes an element of moderate real gain.

Retrospect: the Decade of the 'Seventies

For the ten years 1971-1980, comparable fifty-state totals and approximate percentages of two-year gain have been reported each year as follows:

Fiscal years -	1971	1972	1973	1974	1975	1976	1977	1978	1979	1980
Billions of $ -	7.0	7.7	8.5	9.7	11.0	12.7	13.9	15.3	16.9	19.0
2-yr gain % -	38	24	23	25	29	28	24	20	22	24

While these rates of gain are substantially lower than those of the latter half of the 1960's, some of which reached 40 per cent or more, yet the cumulative ten-year gain for the 1970's (207 percent) indicates that state tax support of higher education, viewed nationwide, made substantial if moderate progress. Any impression that this decade was one of decline and disaster will not hold water. It was a time of modest upward growth.

This is not to deny that there have been many local instances of cutbacks and hardships; but the wide picture has not depicted a downward slope, but only some slowing down of the tempo of growth of state tax support, which continues its upward trend.

Some Highlights of 1980

For fiscal 1980 the two-year rates of gain by states ranged from 8 percent to 43 per cent. The median is at 21 percent. Seven states are at that point: Alabama, Delaware, Minnesota, Missouri, Ohio, South Dakota, and Virginia.

Arranged in descending order of their respective rates of two-year gain, the top quartile of the fifty states (26-43 per cent inclusive) embraces 8 states that gained 30 per cent or more, and all these are in the South or Southwest: California, Louisiana, Arkansas, Kentucky, Oklahoma, New Mexico, South Carolina, and Tennessee. Of the four others at 26 per cent or above, two are also in the Sunbelt: Georgia and North Carolina. Only two are elsewhere: Kansas and Oregon.

In the second quartile (21-25 per cent inclusive) four are in the southern-most tier: Florida, Mississippi, Texas, and Alabama. Two are in the Northeast: Maine and Massachusetts. Three are in the North Central: Iowa, North Dakota, and Michigan. Three are in the Far West: Nevada, Utah, and Washington.

The third quartile (18-21 per cent inclusive) has five in the North Central: Minnesota, Missouri, Ohio, South Dakota, and Illinois. Six others are in the Northeast: Delaware, Rhode Island, Maryland, New York, New Jersey, and Vermont. One is in the South: Virginia; and one in the Mountain West: Wyoming.

The fourth or lowest quartile states show a shotgun scatter: Three are in the North Central. Three are in the Northeast: Connecticut, Pennsylvania, New Hampshire. Four are in the Mountain West: Montana, Colorado, Idaho, and Arizona. Two are extra-continental: Hawaii and Alaska. One is in the Border South: West Virginia. It can be noted that all the eight lowest (less than 15 per cent) are either in the Northeast, or west of the Great Plains.

How the Map Looks

When looking at the map, view the continental U. S. as composed of four quadrants, centered at the northeast corner of Kansas. These observations will emerge:

Quadrants --	NW	NE	SE	SW	Totals
Top	1	0	7	4	12 states
Quartiles -- 2d & 3d	4	11	7	3	25 states
Lowest	4*	6	1	3+	13 states
*Includes Alaska				+Includes Hawaii	
Totals	9	16	15	10	50

A glance discloses that as to the current rate of two-year gains, the SE quadrant is clearly in the lead, followed in descending order by the SW, NW, and NE quadrants. Of the states composing roughly the southern half of the nation, 11 are in the top quartile, with only 4 in the lowest; whereas in the states of the northern half, only 1 is in the top, with 9 in the lowest quartile. It is noteworthy, however, that the NE quadrant shows some improvement in relative standing over the most recent one, two, and three years.

It may be noted that the eight most populous states-- California, New York, Texas, Pennsylvania, Illinois, Ohio, Michigan, and Florida, appropriated almost 50 per cent of the entire $19 billion appropriated by the fifty states.

Many other observations can be made from the data. At this point there is neither time, space, nor inclination to make elaborate analyses, because the top priority is to make the data available in this timely publication, not far from the end of the first quarter of the fiscal year.

Limitations and Definitions

The priority of timeliness imposes some restrictions. The sums named are appropriations of state tax funds for annual operating expenses of higher education, reported in accord with the ground rules on an early page herein. They can not include supplementary appropriations or other changes made later in the fiscal year. In some instances where appropriations are made to some state agency other than higher education governing or coordinating boards, "in a sum sufficient" to cover salary increases, fringe benefits, or contingencies not determinable until the termination of the fiscal year, it is obvious that such sums must be represented by estimates or approximations.

Many diversities among the states in accounting and reporting preclude instant reduction of the whole to absolute uniformity; but a reasonable approach to comparability, both from year to year and among different states, is maintained. The figures are not to be confused with audited reports of actual expenditures, which could not be assemble and published until more than a year later.

Acknowledgments

This twenty-first consecutive annual fifty-state summary is the product of the conjointed efforts of many contributors across the nation. To each and all of them, and especially to Gwen B. Pruyne of Illinois State University, I am grateful for competent collaboration. May they be rewarded by their knowledge of the usefulness of this document and its twenty annual predecessors. Individual responsibility for any errors and shortcomings is mine.

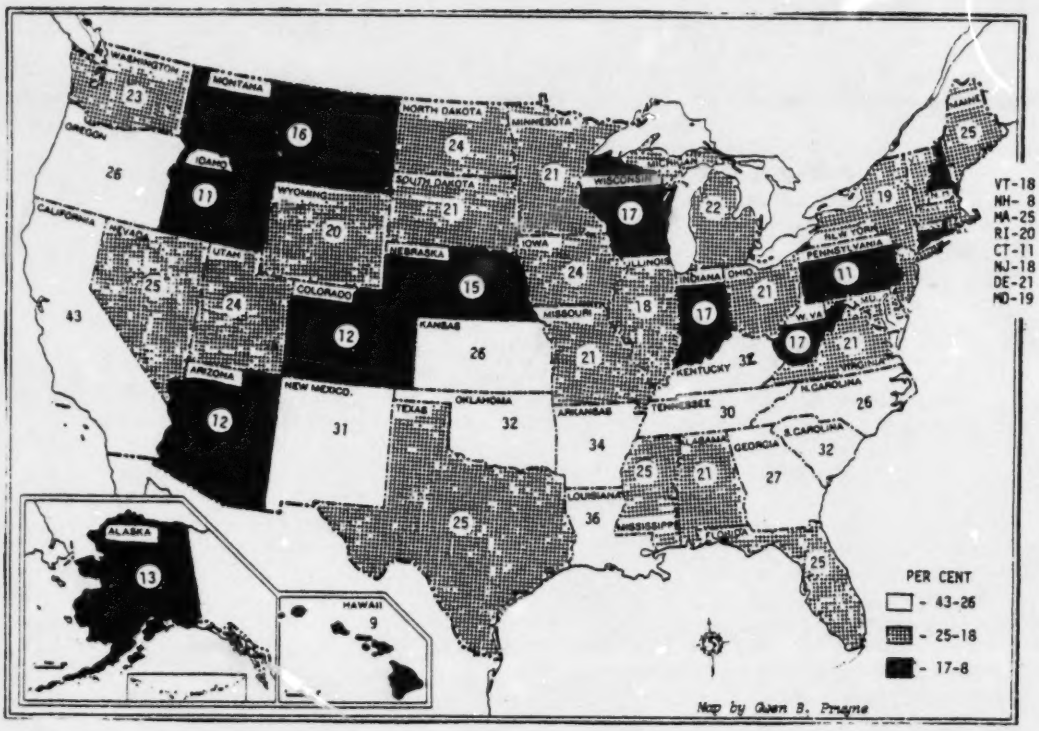
October 1979

PERCENTAGES OF TWO-YEAR GAINS IN APPROPRIATIONS OF STATE TAX FUNDS FOR ANNUAL OPERATING EXPENSES OF HIGHER EDUCATION IN THE FIFTY STATES, FISCAL 1980 OVER FISCAL 1978



WHAT THE FIGURES ARE INTENDED TO MEAN

1 Report only appropriations; not actual expenditures. GRAPEVINE's 50-state annual summary is published annually in October, early in the fiscal year. Its principal usefulness is its timeliness. Don't wait.

2 Report only sums appropriated for annual operating expenses.

3 Exclude appropriations for capital outlays and debt service.

4 Exclude appropriations of sums derived from any source other than state tax funds. Exclude all moneys derived from Federal sources, local sources, or student fees.

5 Include sums destined for higher education, but appropriated to some other state agency. (Examples: funds intended for faculty fringe benefits may be appropriated to the State Treasurer and disbursed by him; certain funds for medical or health education may be appropriated to the State Department of Health and disbursed from that department.) Sometimes these sums have to be approximated or estimated, because the exact amounts disbursed can not be known until after the end of the fiscal period. Include them, even if only estimated.

6 If possible without undue delay, in complex universities please set out separately sums appropriated for main campus, branch campuses, and medical centers (even if on the main campus). The medical center item should include operation of colleges of medicine, dentistry, pharmacy, nursing, and teaching hospitals, either lumped as one sum or set out separately as preferred.

7 Include, if possible, sums appropriated to statewide coordinating boards or governing boards, either for board expenses or for allocation by the board to other institutions, or both.

8 Include sums appropriated for state scholarships or other student financial aids, except for capital outlays.

9 Include sums appropriated for state aid to local public community colleges (and for operation of state-supported community colleges), and for vocational-technical two-year colleges or institutes which are predominantly for high school graduates and adult students.

10 Include sums appropriated directly to private institutions of higher education at any level.

FURTHER NOTES: The above 10 "ground rules" will each require some exercise of reasonable judgement in establishing boundaries, because the diversity in legislative and administrative practices among the states is complex.

We avoid extending the "ground rules" beyond endurance by referring to the copy of our tabulation for your state for the preceding year, attached to our letter which accompanies this sheet.

You are asked to use that tabulation as a take-off point, and construct a similar tabulation for the next fiscal period, being careful to indicate any insertions or additions necessary to update it.

Especially you are asked to add the final column of your tabulation, to give us a statewide total figure which may be compared with our comparable figure circulated two years earlier, so we can calculate the rate of gain over two years with reasonable accuracy. It would also be helpful if you would give us your own estimate of this percentage of 2-year gain.

(Continued on next page)

(Continued from preceding page) Indiana

*Acronym for Indiana University-Purdue University at Indianapolis, which includes the Indiana U medical center, law school and other Indiana U units, as well as offering academic programs of Purdue University.

**This involves the operation and further planning of a statewide system of decentralizing medical education by having it accomplished in part at colleges and hospitals in various cities, with the entire system being a part of the Indiana U School of Medicine.

***A statewide multi-media communication network providing service to both public and private postsecondary institutions, administered by Indiana U.

+Dual campus of Indiana U and Purdue U. The boards of trustees of the two institutions designate one of the institutions as fiscal agent.

++Combines the animal disease diagnostic laboratories and the Bangs disease testing service, previously reported separately.

+++Includes the previously separately identified appropriations for: agriculture marketing research, utilization of agricultural products, mechanical agricultural production research, and eradication of Johnson grass.

#Previously admistered by the State Budget Agency.

##A two-year community college now largely supported by the state, but partly by the county where it is located.

###A statewide postsecondary education institution created to provide vocational-technical education by various means, including establishing and operating postsecondary institutes within each of thirteen regions of the state.
